#### DETAILED ACTION

#### Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 9, 2004 has been entered.

Claims 24-53 are currently pending.

## **Drawings**

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: "86" in Fig. 6. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filling date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

## Specification

3. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

## Claim Rejections - 35 USC § 112

- 4. The following is a quotation of the first paragraph of 35 U.S.C. 112:
  - The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
- 5. Claims 24-53 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

It appears that Applicant has failed to describe embodiments where: (1) the device has a characteristic of an inherent/open-loop dynamic compliance function with includes frequency dependent real and imaginary parts; (2) the gain function and the inherent/open-loop dynamic compliance function together establishing an operative/closed-loop resonance condition specific to the reference position; (3) the operative/closed-loop resonance amplitude being sufficiently large to prevent the tip from becoming stuck to the sample but being sufficiently small to prevent the sample surface from becoming excessively damaged; (4) displacements of translation; (5) displacements of bending; (6) the inherent/open-loop quality factor is indicative of over-damped oscillations and the inherent/closed-loop quality factor is indicative of under-

Art Unit: 2878

damped oscillations; (7) the inherent/closed-loop quality factor is at least one order of magnitude higher than the inherent/open-loop quality factor; (8) the tip is in a liquid when the device is at the reference position and wherein the tip is in the liquid while the tip intermittently contacts the sample surface; and (9) the tip is of a form appropriate for nanoindentation.

Examiner invites Applicant to cite specific sections of the original disclosure that supports such embodiments. Otherwise, Examiner reminds Applicant that no new matter may be added.

- 6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

  The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 7. Claims 30, 31, 38, 41, 42 and 49 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 30, 31, 41 and 42, "the inherent/closed-loop quality factor" lacks proper antecedent basis.

Regarding claims 38 and 49, it is unclear what scope the terms "the tip is of a form appropriate for nanoindentation" encompasses.

## Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thanh X. Luu whose telephone number is 571-272-2441. The examiner can normally be reached on M-F 6:30AM-4:00PM.

Application/Control Number: 10/673,266 Page 5

Art Unit: 2878

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dave Porta can be reached on 571-272-2444. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
